Objective:

Fulltime position in the field of Information Management and Architecture with a forward-thinking firm. I want to use my analytic and creative skills as well as my technical knowledge to identify and take advantage of opportunities in information products or services.

Work Experience:

Researcher, SetLabs, Infosys Technologies Ltd., Bangalore, India, June – August 2006

- Internship with a prominent global IT- and strategic services company in India.
- Perform independent research around the concept of “information management”
- Distill a coherent and comprehensive definition of “information management,” develop a framework for understanding the concept, and investigate approaches to modeling information architecture.

Webmaster and Systems Administrator, Political Science Dept., UC Berkeley, 2001 – 2006.

- Maintain and update department’s public website and intranet: involving the integration of databases, interfacing with campus-wide information systems, managing SSL certificates.
- Design and implement a web-based graduate student application and review system to replace the existing paper-based process, becoming the second department at UCB to implement such a system.
- Redesign the entire department website user interface and layout (over 500 individual pages).
- Responsible for purchasing, setup, and troubleshooting of faculty and student computer systems and network, including webserver, backed-up fileserver, and Windows domain controller.
- Research and evaluate new technologies for potential pedagogical or administrative value.

Research Associate, New America Foundation, Washington D.C., August - December 1999.

- Internship with a prominent non-partisan public policy institute.
- Research, write, and present report on the state of the “digital divide” in access to technology.
- Prepare background materials and coordinate press coverage for New America’s major conference on the “digital divide”
- Draft internal policy memos and contribute generally to the intellectual atmosphere.

Professional Skills:

- **Programming:** web development in ASP, PHP, DHTML, and CSS, database design in MySQL.
- **Interpersonal:** experience leading small teams, training users and coworkers.
- **Research:** policy research, product comparison, design prototyping.
- **Computer:** Windows system administration, Photoshop, office suite, MS Project.
- **Personal:** analytic thinker, enjoy problem solving, eager to learn.

Education:

University of California, Berkeley, School of Information Management and Systems

Masters of Information Management and Systems, May 2007.

Coursework in information policy and law, project management, design and human factors.

University of California, Berkeley, graduate with honors, May 2001

Bachelor of Arts, Political Science: honors thesis on “Governance Institutions and Open Source Software”.

Computer Science coursework in software programming and computer architecture.
